Series Statement

Series Name: Census of State and Federal Adult Correctional Facilities Series

Series Information: This census is the seventh enumeration of state adult correctional institutions and the fourth of federal

institutions sponsored by the Bureau of Justice Statistics and conducted by the Bureau of the Census. Earlier censuses were completed in 1974 (ICPSR 7811), 1979 (ICPSR 7852), 1984 (ICPSR 8444), 1990 (ICPSR 9908), 1995 (ICPSR 6953), and 2000 (ICPSR 4021). For each facility, information was provided on physical security, age, functions, capacity, court orders for specific conditions, one-day counts and average populations, race/ethnicity of inmates, inmate work assignments, inmate deaths,

special inmate counts, assaults, and incidents caused by inmates.

Abstract

The 2005 Census of State and Federal Adult Correctional Facilities (CSFCF) was the seventh enumeration of State institutions and the fourth of Federal institutions sponsored by the Bureau of Justice Statistics and its predecessors, and conducted by the U.S. Census Bureau. Earlier censuses were completed in 1974, 1979, 1984, 1990, 1995 and 2000. The facility universe was developed from the Census of State and Federal Adult Correctional Facilities conducted in 2000. Each State's department of corrections was contacted to identify new facilities and facilities that had been closed since June, 2000. Telephone follow-ups were carried out during 2006. All but one respondent - State of Illinois - participated in the census.

Facilities were included in the enumeration if they were 1) staffed with Federal, State, local, or private employees; 2) held inmates primarily for State or Federal authorities; 3) were physically, functionally, and administratively separate from other facilities; and 4) were operational on December 30, 2005.

The census included the following types of adult correctional facilities:

- Prisons
- · Prison farms
- · Reception, diagnostic, and classification centers
- Facilities primarily for parole violators and other persons returned to custody
- Road camps, forestry camps, and conservation camps
- · Youthful offender facilities except in California
- Vocational training facilities
- · Drug and alcohol treatment facilities
- State operated local detention facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont

The census excluded the following type of institutions:

- · Private facilities not primarily for State or Federal inmates
- Military facilities
- · Immigration and Customs Enforcement (ICE) facilities
- Bureau of Indian Affairs facilities
- Facilities operated by or for local government, including those housing State prisoners
- · Facilities operated by the US Marshals Service
- · Hospital wings and wards reserved for State prisoners
- · Facilities that hold only juveniles

DEFINITION OF TERMS

Community-based facilities - Correctional facilities were classified as community-based if 50% or more of the residents were regularly permitted to leave, unaccompanied by facility staff, to work or study in the community. Community-based facilities included entities such as halfway houses, residential treatment centers, restitution centers, and prerelease centers.

Confinement facilities - Correctional facilities in which less that 50% of the inmates left the facility unaccompanied on a regular basis. Confinement facilities included prisons, prison farms, penitentiaries, correctional centers, work camps, and reformatories.

Design capacity - Design capacity is the number of inmates that the facility planners or architects intended for the facility.

High security facilities - High security facilities were described as supermax, maximum, close, or high-security facilities and were characterized by a wall or double-fence perimeter, armed tower and/or armed patrols. Cell housing was isolated in one of two ways: Within a cell block so that a prisoner escaping from a cell was confined within the building; or by double security from the perimeter by bars, steel doors, or other hardware. All entry or exit was via trap gate or sally port.

Medium security facilities - Medium security facilities were characterized by a single or double fence perimeter with armed coverage by towers or patrols. Housing units were cells, rooms, or dormitories. Dormitories were living units designed or modified to accommodate 12 or more persons. All entry or exit was via trap gage or sally port.

Minimum security facilities - Minimum or low security facilities were characterized by a fence or "posted" perimeter. Cell housing units were rooms or dormitories. Normal entry and exit were under visual surveillance.

Rated capacity - Rated capacity is the maximum number of beds or inmates allocated by a rating official to institutions with the jurisdiction.

Methodology and Processing

Notes

DATA LIMITATIONS

Among the most fully reported information were the following variables designated as "critical data items": V21, who operates the facility; V22, gender of the inmates the facility is authorized to house; V23, the physical security level of the facility; V38, the percentage of inmates permitted to leave the facility, unaccompanied, to work, study, or participate in rehabilitation programs; V39, the number of inmates under age 18 on June 30, 2000, by gender; V36 and v37 male and female average daily population between 1/1/05 and 12/30/05; and v78 the total number of inmates on 12/30/05.

When facilities did not provide data on a particular variable, estimated figures were accepted. Total figures were estimated by multiplying known or reported numbers by the ratio of the total relevant population to the reported population. Because the census was a complete enumeration, the results were not subject to sampling error.

Data Files Description

Data For Illinois and California

Data for Illinois in 2005 was estimated as follows: facility level data was reported as of June 30, 2000. State level numbers of facilities and inmates were reported as of June 30, 2005, based on information reported on the Illinois Department of Corrections web site.

Calculation of Illinois' 2005 data began with 48 institutions and 44,150 inmates recorded in the 2000 Census. Seven facilities closed between 2000 and 2005, 2 new facilities were added and 2 facilities merged for a count of 44 institutions with 41,777 inmates. To bring the final number of inmates into agreement with Illinois' published population figure of 44,669 on June 30, 2005, 2,892 inmates were manually added to the State's count. Because information was not available to make this adjustment by individual facility, it is not reflected in the data file. As a result, the number of inmates on December 30, 2005, as shown in the report text and in state-level tables 1, 10, 14, and 17 differs from results produced by accessing the data set as follows:

	Report text and tables	Data set results
U.S. total	1,430,208	1,427,316
Public	1,321,757	1,318,816
Private	108,451	108,500
Federal	145,780	145,780
State	1,284,428	1,281,536
Midwest	255,134	252,242
Illinois	44,669	41,777

Individual facility level data on California correctional employees was not available for publicly operated correctional institutions in 2005. Staff numbers produced by accessing the data set include only that state's private facilities. State-wide numbers of male and female staff and staff by occupational category other than correctional officers were estimated for public facilities and published in the 2005 Census report text based on their proportions reported in the 2000 Census. As a result, the number of staff by gender and the number of correctional officers by gender as shown in the report text and in state-level tables 12, 13, 14, and 15 differs from results produced by accessing the data set as follows:

ILLINOIS

GENERAL INFORMATION

Between June 30, 2000 and December 30, 2005, seven Illinois facilities closed, two new facilities opened, and two facilities merged for a total count of 44 institutions holding 41,777 inmates in 2005. For the 2005 census, 2,892 inmates were added to the count to bring the number of inmates housed in Illinois of 44,669 prisoners into agreement with the number of inmates reported on the Illinois Department of Corrections Website as of June 30, 2005. Because information was not available to make this final adjustment by individual facility, the 2,892 prisoners are not reflected in the data file. Consequently, the number of inmates, nationwide, in the Midwest, and in Illinois differ in the published report tables vs. the results obtained by accessing the data set. See page 80 of this codebook for further discussion.

What types of facilities are included in this census?

For purposes of this census, a facility has a separate budget and administratior. Facilities that share budgets or administrators should be reported as a single facility.

The census includes all correctional facilities administered by State or Federal governments or by private corporations primarily for State or Federal governments, which are intended for adults but sometimes hold juveniles.

- INCLUDE prisons, penitentiaries, and correctional institutions; boot camps; residential community correction centers; prison farms; reception, diagnostic, and classification centers; road camps; forestry and conservation camps; youthful offender facilities (except in California); vocational training facilities; prison hospitals; and drug and alcohol treatment facilities for prisoners.
- INCLUDE State-operated local detention facilities in Alaska, Connecticut, Delaware, Hawaii, Rhode Island, and Vermont.
- EXCLUDE privately-operated facilities that do not primarily house State or Federal inmates.
- EXCLUDE facilities operated and administered by local governments that do not primarily house State or Federal prisoners.
- EXCLUDE facilities that hold only persons under the jurisdiction of juvenile correctional authorities.

DEFINITIONS

1. Facility security level – Super maximum, maximum, close, or high – is characterized by walls or double-fence perimeters, armed towers and/or armed patrols. Cell housing is isolated in one of two ways: within a cell block so that a prisoner escaping from a cell is confined within the building; or by double security from the perimeter by bars, steel doors, or other hardware. All entry or exit is via trap gate or sally port.

Medium – is characterized by a single or double fenced perimeter with armed coverage by towers or patrols. Housing units are cells, rooms, or dormitories. Dormitories are living units designed or modified to accommodate 12 or more persons. All entry or exit is via trap gate or sally port.

Minimum or low – is characterized by a fenced or "posted" perimeter. Cell housing units are rooms or dormitories. Normal entry and exit are under visual surveillance.

- 2. Rated capacity is the number of beds or inmates authorized for safe and efficient operation of the facility. It may exceed design capacity due to double bunking. However, beds in an area not designed as sleeping space, such as day rooms and multipurpose rooms, should not be included in rated capacity.
- 3. Inmate custody level Maximum, close or high is assigned to prisoners requiring the highest degree of supervision because they pose a danger to others and to the institution; or because their well-being would be in jeopardy if they refused protective custody. These prisoners cannot participate in activities requiring outside movement, and their inside movement is closely observed.

Medium – is assigned to prisoners needing more than minimal supervision. Their inside movement and call-outs require passes and/or supervision. Their outside movement requires restraints except for work or program assignments.

Minimum or low – is assigned to prisoners posing the least threat to the institution and public safety. They include inmates assigned to community service centers and halfway houses and those who participate in work, education, and other activities in the community. They are generally permitted to move unescorted for program and work assignments.

4. Assault – is an attack that results in physical injury ranging from minor bruises or cuts needing no first-aid to death or serious harm requiring immediate hospitalization.

- **5. Security staff** are officers of all ranks and other uniformed staff who, regardless of their staff titles, are in direct contact with inmates, and involved in their daily custody, care, supervision or monitoring.
- 6. Serious injury severely restricts the prisoner's or staff member's usual activity. This type of injury requires immediate medical attention more extensive than first-aid, and may include bandaging wounds, stitches, setting bones, and treatment of concussion.
- Weapons include guns, sharp objects, pointed objects, solid or blunt objects, and toxic or flammable substances.
- **8. Significant property damage** is loss of property valued at \$1,000 or more.
- 9. Major disturbances are actions with inmates resulting in serious injury or significant property damage and loss of control of a portion of the facility. Loss of control occurs when prisoners together disrupt facility operation and disobey lock down orders. Major disturbances require extraordinary measures to regain control of the facility.
- 10. Other disturbances are actions such as hunger strikes, work slowdowns, or other inmate disruptions resulting in loss of control of a portion of the facility, and require extraordinary measures to regain control. Other disturbances do not entail serious injury or significant property damage.
- 11. A secure facility has a perimeter and barriers such as walls to keep prisoners from leaving. Surveillance methods – guard towers, perimeter patrols and electronic monitoring devices – detect those attempting to escape.
- 12. Escape from a secure facility occurs when a prisoner breaches the last line of security. If a prisoner clears the first fence of a double fenced facility but not the second, it is not an escape. Those who clear the second fence, even if apprehended on prison grounds, have escaped.
- 13. Walkaway prisoners leave custodial supervision outside a secure institution while on detail, during transportation, medical visit, or court appearance and are recorded as AWOL. Inmates who do not return on time from furlough or other temporary release should not be counted as escapees.
